

## OIKOS MARINE & SOUTH SIDE DEVELOPMENT

### What is the purpose of this exhibition?

At its facility at Haven Road on Canvey Island, Oikos Storage Limited (Oikos) proposes to construct additional marine loading and unloading infrastructure on two of its marine jetties and redevelop the southern part of the Terminal's port estate. The project will be known as the 'Oikos Marine & South Side Development', or 'OMSSD' for short.

The development proposals are at a very early stage and still need to be subject to further detailed design, evaluation and assessment. To assist that process, however, the team at Oikos want to start engaging with the local community in order to better understand the issues which we will need to consider and take into account as the proposals develop.

Submission of the applications for the necessary approvals for the development is many months away and a great deal of work still needs to be undertaken.

### The purpose of the exhibition is:

To introduce the OMSSD project as it currently stands.

To explain the approval process that needs to be followed along with the timeframe.

For you to provide us with views and comments on the OMSSD project to help the team at Oikos better understand the issues which need to be taken into account.
